G.O. Ms. No. 285 Dated the 27th February 1950.

READ:

Letter from the Collector of Coimbatore No. R.C. 21964/49/L.9 dated 15/12/49.

Board's Ref.023387-III/49/9 ~~/8~~ dated ~~15/1/50.~~ 27-12-49.
Govt. Memorandum No. 53094-K/49-8 dated 15.1.50.

O R D E R:

The proposals submitted by the collector of Coimbatore with his letter cited above and by the representatives of the Coimbatore district, Agricultural Association for the introduction of a scheme of levy for procurement instead of the present intensive procurement scheme were discussed on 20-1-1950 at a conference of officials and the representatives of the Association presided over by the Hon'ble the Chief Minister. As a result of the agreement reached at this conference, the government direct that the levy scheme proposed by the collector of Coimbatore should be tried in the Coimbatore district as an experimental measure till the end of the current Khariff year and given effect to immediately subject to the following conditions and notifications:/

(1) Assuming that the coming seasons and monsoons will be normal, not less than 25,000 tons of paddy and 20,000 tons of millets should be procured under the scheme before the close of the khariff year viz., 31/10/50 . The collector will be responsible for achieving this target.

(2) The rate of levy should be as shown in the statement appended to this order.

(3) The collector will have discretion to lower the scale of levy in particularly hard cases but this discretion should be exercised by him sparingly.

(4) Crop cutting experiments should be conducted on representative plots by the officers of the Civil Supplies to determine the outturns. They should be conducted on plots of not more than 50 cents each and there is no objection to limit them to lower extents provided they are either whole survey numbers or entire sub divisions.

(5) As the levy is proposed to be collected only from the owners of lands and not from tenants and as the village adangals will not show in one view the extent and particulras of crops cultivated by each registered holder, procurement register A should continue to be prepared.

(6) As soon as the sowing or transplanatation of a procurable crop is over in a village the collector should arrange to have a list published at each village chavadi or other public place showing the extents and crops cultivated by each holder and invite objections, if any, to be preferred to a sepficifi officer within a prescribed period. These objections should be disposed of by that officer after necessary enquiries and his decision should be intimated in writing to the person concerned with the least possible delay.

2 (7) It was also agreed at the conference that the levy scheme should be put on a statutory basis. The Board of Revenue (Civil Supplies) is requested to submit the necessary draft notifications for the approval of the government.

3/ The non/official representatives suggested that the ryots who had some surplus x to sell after fully delivering the quantities levied on their holdings should be permitted to sell such surplus to consumers direct at the retail prices in force in the government ration shops. This suggestion cannot be accepted. The sale should only be to the procuring agent nominated by the collector.

4. The non-official representatives also suggested that instead of launching prosecutions against persons who fail to deliver their quotas and dragging them to the Criminal courts, a fine equal to thrice the value, at Government procurement rates, of the quantity which they have failed to deliver should be imposed. The Board is requested to consider th s suggestion and if it is feasible to incorporate the necessary provision in the draft notification called for above.

(BY ORDER OF HIS EXCELLENCY THE GOVERNOR.)

M.A. Kuttalalingam Pillai,
Secretary to Government.
